12 WEEK - 10K RUN PLAN

This plan is 12 weeks long and will prepare you to complete the Narragansett Summer Running Festival 10K! It is written using rated perceived exertion (RPE) and the provided chart will help you know the effort levels for your runs each day.

Minimum training requirements suggested for this plan:

It is recommended that you should be able to comfortably jog/run for a total of 20 minutes prior to beginning this plan. Keep in mind this is a beginner's plan that is designed to get you to your first 10K finish line.

Estimates for this plan:

Weekly total volumes start at: Approximately 1hr and 40 minutes of running

Weekly total volumes peak at: Approximately 4hrs of running

Think this plan may not be the right plan for you? Check out our other run plan options at www.therunformula.com. We have running plans for all distances and abilities!

A Few Notes about the plan:

- Run workouts are mostly written in duration. All workouts can be adjusted by simply reducing or increasing the length of the workout. If the starting volume is too high, then start the run program at a reduced volume and slowly increase the volume each week. Increasing by 10% each week is a good rule of thumb to use.
- When possible, try to keep your training as scheduled on the plan. If you do need to make adjustments, do not "stack" your workouts so that you have multiple run/hard days in a row. The key is allowing your body to recover from the hard sessions by incorporating easier days in-between. Make an effort to have a rest or recovery day one day per week. If you need to take an additional day off each week - skip the workouts listed as recovery or cross training days.
- Here is a guide to some of the common terminology referred to in the plan. **Examples:** - **RI** (Rest Interval) - Amount of Rest between each set, **30"** (30 seconds), **2'** (2 minutes), **Z1** (Zone One RPE)

Example workout: **33' Aerobic - Z1**
 5' run steady pace
 30" walk for total of 33'

This refers to – total workout 33 minutes – Aerobic Z1 pace. The breakdown of the workout is 5 minutes of running and 30 seconds of walking, repeating until you reach a total of 33 minutes. In this example, you would end up running a total of 30 minutes for the workout.

- The plan includes cross training days that are meant to give you a break from the pounding of running, but still keep your body active and your blood flowing! These days could include a walk, a swim or a spin class. Also, of importance is to include some strength work.
